**Web hosting with everything you need to get online**

### Let's Encrypt SSL Security

SSL certificates can be added to your sites for no additional cost, giving you easy HTTPS connections.

### Easily install WordPress and more

Start a blog or shop in just a few clicks with over 70 popular applications (including Magento).

### 45-day money-back guarantee

Try out our hosting for 45 days, and if you aren't satisfied, we'll give you your money back.

## All packages include

### **Built for speed and performance**

We've designed our hosting platform to give you fast response times while also using SSD storage to reduce the energy used in our data centre. Add in multiple redundancies and connections, and our platform keeps your website online even if anything breaks down.

### **Easy to use control panel**

Our cPanel hosting control panel makes it a breeze to manage your website, letting you edit files, create email addresses, install software, and more - all in one convenient location. And if you want a more hands-on approach, we have SSH for command-line experts.

### **Email addresses with 10 GB of storage**

Get everyone online with their own email address, complete with 10 GB of storage per mailbox and built-in spam protection.

Use our webmail to access your email from anywhere, or download it directly into the mail app of your choice.

### **Easily Install your favourite software**

With over 70 applications ready to install in just a few clicks, you can build your website exactly as you want it. Whether you're using WordPress for your blog, Magento for your store or Laravel for your app, we have what you need.

### **Hosting that grows with your website**

Our servers are built from the ground up to support your website, no matter what.

If you suddenly go viral, your website's automatically given the resources it needs, keeping it online and responsive without affecting other customers.

### **Fast connections all over the world**

Our Professional and Ultimate packages include our in-house content delivery network (CDN), which stores your website on servers across the planet, giving you even faster loading and response times no matter where your visitors are coming from.

Why choose Eco Web Hosting?

### New trees with every package

For each hosting package we plant trees in Haiti, Indonesia, and Nepal, supporting local communities and reducing our carbon impact.

### Green business practices

Our data centres run on 100% sustainable energy, and our team members work together to run an eco-friendly business. We've worked remotely since the company was started, and offset our own carbon footprints.

### Fast & free migrations

Already with another host? Our team can transfer your existing sites to us completely free. Most transfers are handled within 24 hours.

### First-class support

Our friendly hosting experts are on hand via our ticket system or live chat. We also have a support database full of helpful information.

## Features breakdown

Comprehensive features for a premium hosting experience

**Samsung Enterprise SSD storage**

Our server platform is built with solid state drive (SSD) storage, giving you super-

**Multiple redundancies built in**

Each package sits on a network built with multiple redundancies, from storage

fast read and write response times while keeping energy consumption low.

- ✓ **Autoscaling load-balanced platform**  
Resources are deployed automatically if a site has an increase in usage, with allocations spread across the whole platform to keep everything running fast.

- ✓ **CDN nodes world-wide**  
Our content delivery network caches your site in 21 cities in 14 countries around the world, giving your visitors a fast-loading copy anywhere.

- ✓ **Web Application Firewall**  
Our bespoke firewall protects our servers and your site from attacks online by inspecting incoming traffic for malware and attacks and blocking them.

- ✓ **Linux or Windows platform**  
Select the platform that best suits your customers' websites, whether it's Linux for most sites and software, or Windows for .NET and Microsoft SQL.

to databases to emails, with offsite backups for even more protection.

- ✓ **Dual 12-core processors**  
Our reseller packages are powered by two 12-core Intel Xeon Scalable processors, with hyper-threading and 64 GB of RAM for lightning-fast responses.

- ✓ **Let's Encrypt SSL certificates**  
With Let's Encrypt, you'll have SSL certificates attached to your website for no additional cost, giving you HTTPS connections that are secure, easy, and popular with search engines.

- ✓ **DDoS Protection**  
Built-in Distributed Denial-of-Service (DDoS) attack protection blocks malicious traffic before it even visits your websites, keeping everything running no matter what.

- ✓ **Over 70 applications available**  
Let your customers install their favourite applications in one click, including WordPress, Drupal, Magento, Laravel, and many more.

✓ Popular programming languages supported  
Build your own application in a wide range of programming languages, including PHP, Perl, Python, Ruby, .NET, and more.

✓ SSH access included as standard  
Set up Git, manage files, test crons, use installed programming languages and applications, run scripts, and use command-line tools with SSH access.

✓ POP3 or IMAP email access  
Download your email into the application of your choice either through POP3 or IMAP, and send emails from anywhere with SMTP.

✓ DKIM anti-spam protection  
Use DomainKeys Identified Mail (DKIM) on your outgoing email to add in an extra level of identification for all your outgoing email.

## Value, quality and excellent service

4.9 out of 5 on

Based on 562 reviews

Our team comes from some of the biggest brands in the industry, who know what it takes to provide reliable and fast web hosting. With Eco Web Hosting, we wanted to create a company that values quality products, exceptional customer service, and a commitment to the environment over acquisitions and profit margins.

22nd July 2022

**“No hesitation – the best hosting”**

If you want old-style humans sorting out your issues, then look no further. No hesitation – the best hosting for independent websites and new developers.

**Greg**

13th July 2022

**“Great ethical web host!”**

They're always quick to respond to questions I have, and always give great service!

**Eva McHugh**

1st June 2022

**“Prompt and helpful”**

I chose Eco Web Hosting because they were a reasonable price, low carbon, and based in the UK. Then I found out they had real people that could actually help!

**Graham**

16th May 2022

**“Amazing customer service”**

Probably the most friendly web hosting I have ever had.

**Ghilliesuit Gaming**

## Frequently Asked Questions

Finding the right web host can be a confusing process, especially if you're just getting online. Here are some of the frequently asked questions we receive. Still not sure? We're here to help.

## Can Eco Web Hosting transfer or migrate my existing website?

Yes, we can! Free migration is included with all our web hosting and can be done from all control panels, including cPanel and Plesk, and for all software packages, including WordPress and Magento. Just purchase your new hosting package from us, fill out our Migration Request form, and our Support team will get in touch with you for further details. They'll work with you to migrate your sites over from your current hosting company and make sure everything is running smoothly before they go live.

## What applications can I install on my site?

In our control panel, we have over 70 applications that you can install in just a few clicks, whether you need a content management system, online store, or development framework. These include WordPress, Drupal, Joomla!, Magento, OpenCart, Laravel, and many more. You can also install your own applications, or any other scripts, provided they meet [our Fair Use Policy](#)

## What's the difference between Windows and Linux hosting?

Most websites will work smoothly on either platform, but Windows is necessary if you want to run ASP, ASP.NET, or .NET applications. Linux will run most scripts, programs, and applications that are commonly used to build websites, including WordPress, Joomla!, Drupal, and Magento.

## What programming languages can I use?

We have a wide range of programming languages available, including PHP 7+, Ruby, Perl, Python, ASP, ASP.NET, and more. If you're looking for a specific language, talk to our Support team and we'll see what we can do for you.

## Do you throttle resources or turn off websites if they get too busy?

With our automatic scaling, we actually give your website more resources when needed. Resources, memory, and processing power are all directed towards your website when it gets busier, and everything keeps scaling up until things quiet down. And all this happens without any downtime!

## Can I use Git or SSH on my site?

Of course you can. You can set up Git for all your version control needs, and SSH is included as standard for each hosting package. You can also set up two-factor authentication or keypair authentication for your SSH access as well.

## How do I get my free domain name?

Once you've purchased your annual package, you'll get a free domain credit, which can be used on a .com, .net, .org, .info, .name, or .biz domain name. The credit is valid for one year from when you purchase the domain, and the domain will renew at the standard renewal price. If you'd like to transfer a domain in, or get a .UK domain name, just [talk to our Support team](#). For further information, please see [our Terms & Conditions](#).

## What payment options do you provide?

We accept all major credit and debit cards, as well as PayPal and PayPal subscriptions for our hosting packages. All prices are in pound sterling and do not include tax, which will be added at checkout based on your location.

## Where are your servers located?

For our web hosting platform, our data centres are located in Derby, England, UK, and Dallas, Texas, US.

Can't find the answer to your question? Our friendly team are happy to help.
